TEST SUMMARY REPORT

SauceDemo E-commerce Web Application

Document Field	Details
Document Version	[Release Version]
Prepared By	Stphenson Anonuevo
Test Period	[Testing Timeline]
Application URL	https://www.saucedemo.com/
Environment	Windows 11 / Chrome V155
Report Status	

1. Summary

This report summarizes the manual testing activities performed on the SauceDemo web application, covering its core functionalities, including login, product inventory, sorting, shopping cart operations, end-to-end checkout and order completion, and logout.

Testing included functional, positive, negative, end-to-end, and UI testing to evaluate the application's behavior against the defined test expectations. Based on the test execution results, no failed test cases were recorded within the tested scope.

The results indicate that the tested functionalities behaved as expected during execution. However, this conclusion is limited to the features, test cases, and environment covered by this testing cycle and does not guarantee that the application is entirely defect-free.

2. Test Scope and Approach

Features tested: Login, product inventory, sorting, cart, checkout, order completion, logout.

Test types performed: Functional, positive, negative, End to End, UI.

Out of scope: Performance, security, payment integrations, unsupported browsers, etc.

Test data and accounts: Dummy Accounts

3. Test Execution Results

Metric	Count	Notes
Total test cases in scope	12	Total planned cases
Passed	12	Cases meeting expected results
Failed	0	Cases with a confirmed mismatch
Blocked	0	Cases unable to proceed
Not Run / Not Executed	0	Cases not executed during this cycle
Not Applicable	0	Cases excluded with justification, if any

4. Defect Summary

Defect ID	Title / Summary	Severity	Status
[SD-BUG-001 or N/A]	[Brief description of confirmed defect]	[High/Medium/Low]	[Open/Closed/etc.]
[Add row as needed]	[Use N/A if no defects were found; do not invent defects]	—	—

Notable observations: no confirmed defects were identified in the executed testing.

5. Coverage and Traceability

Scenario coverage:

- Verify login with valid credentials, invalid and missing credentials.
- Verify products and product details are displayed.
- Verify sorting products sorting options.
- Verify adding and removing products from the cart.
- Verify cart content and navigation.
- Verify Checkout information validation.
- Verify checkout overview and price calculations,
- Verify end to end user order completion.
- Verify logout and session navigation.

6. Conclusion and Recommendations

All planned test cases were executed. No critical bugs are open. Based on the results, the team recommends moving forward with the release.
